EDUCATION

B.E. Information Technology, 2022 - 2026

EXPERIENCE

Backend Developer Intern, Zeta Payments

Jan 2025 - Jul 2025

- Designed and shipped RESTful API endpoints serving 12k requests per day
- Wrote server-side JavaScript using the Express framework and the Mongoose ODM
- Modelled transaction collections in MongoDB with compound indexes for query performance
- Implemented middleware for request validation, rate limiting and structured error handling
- Collaborated in two-week Agile sprints with daily standups

PROJECTS

LedgerLite - Expense tracking web application

- Single page interface built with React and hooks
- Backend written in Express with route handlers exposing a REST API
- MongoDB Atlas for storage, Mongoose schemas for validation
- Session handling with JSON Web Tokens

Bookmarks API

- Server-side JavaScript runtime handling async I/O for a bookmarking service
- Middleware chain for authentication, CORS and logging

SKILLS

JavaScript, React, Express, Mongoose, MongoDB, REST APIs, Git, HTML, CSS, Agile, Postman, JWT
